

# Task: Create a To-Do List CRUD API with Django

## Objective

Your task is to develop a basic CRUD (Create, Read, Update, Delete) API for a To-Do list application using Django and the Django REST framework. This API should handle the following operations:

1. **Retrieve** all To-Do items.
2. **Add** a new To-Do item.
3. **Update** an existing To-Do item.
4. **Delete** a To-Do item.

## Requirements

- Python
- Django
