Task: Create a To-Do List CRUD Application with UI

Objective

Your task is to develop a basic CRUD (Create, Read, Update, Delete) application for a To-Do list using Django. This application will include:

1. **Viewing** all To-Do items.
2. **Adding** a new To-Do item.
3. **Updating** an existing To-Do item.
4. **Deleting** a To-Do item.

Additionally, you will need to build HTML templates for the user interface.

Requirements

- **Python**: Ensure you have Python installed on your machine.
- **Django**: Install Django using `pip install Django`.
